Hello, friends. We are live on the YouTube channel Forecasts and the Future.

Today we are speaking together with the famous researcher of places of power and Vedic ritual techniques Eegor Meheda. Mr. Eegor, I greet you.

Good day. I greet you, Ms. Veronika. And I greet all our viewers.

Friends, you now have a unique opportunity to ask questions in live mode. We will give prompt answers to them. But I would like to start today's broadcast with a very important question that was written to us in the comments. Mr. Eegor definitely knows the answer to this question. I will comment on it.

I would like to talk about the Golosiyivsky Forest as such an anomalous zone of prophecy of Mother Alipia. Yes, that is, about how she lived there, what was happening. And actually to talk about how Seraphim of Sarov is connected to Golosiyevo.

So, Mr. Eegor, the floor is yours.

Thank you. The question is indeed interesting. The first viewers who started asking it asked it in the context of Mother Alipia. Yes, indeed, this is a saint of the Orthodox Church who was canonized.

She lived for many years in the Golosiyivsky Forest, precisely because she did not have a passport. In Soviet times, everyone who did not have passports was offered to live outside large cities. And that is why she was settled in Golosiyevo, settled in a house that had no owner so that she could live there. An old house, she began to put it in order. And there, well, actually, this is a saint of the Orthodox Church in the canons of Orthodoxy.

She healed people, gave prophecies, took part in the construction of various churches. That is, she has a very positive image both in the Church and among people who profess Christianity.

But indeed, she gave several prophecies that came true. For example, she said that fire would burn underground and trouble would come from this fire.

She said this a few months before the Chernobyl disaster. That is, this fire burned underground, it was the reactor.

And people really, many people received radioactive radiation.

And such disasters, either technological or natural, she predicted before they happened, for example, some earthquakes in distant lands. Yes, for example, even in Indonesia she said that the earth was shaking.

That is, she was in rhythm with nature and could give prophecies or warnings, so to speak, about the catastrophes that were coming.

She also, by the way, many of her prophecies did not come true. She said that seven years after her death there would be a terrible famine. She prophesied this for 1996, but this prophecy did not come true.

She also predicted a great war. Well, now the war is going on, you see, but she did not name the date. And she also calculated that Lenin's body would be taken out of the mausoleum.

Yes, they would take out the body. First the war, then they would take out the body. That's how it is. And that is why she is very respected as a person who sees something. But I have also noticed more interesting moments. After she died and was buried, people began to come to her grave and ask various everyday questions. For example, I know women who came and asked to meet a young man and create a good family. And within a year a young man appeared and a family was created.

Or, for example, if a man offended a woman, then women also went and asked that he leave her and instead a normal man would be found. That is, on this issue, that is, arranging personal life, people still come there. But this is already the modern layer.

Modern. The thing is that when I started working seriously with journalists and TV channels, people began to write letters that in the Golosiyivsky Forest really some anomalous things are happening. Here one woman wrote that after the war, when factories and plants began to be built and rebuilt in Kyiv, she worked at one of these factories. She was supposed to be given an apartment, and she lived in a dormitory with her family, but no one from the management wanted to provide her with a departmental apartment, although such an opportunity existed. And there they told her that she could apply to the city queue, for that go to the Golosiyivsky Forest and negotiate there. There are many people there. At that time it was outside the city, Golosiyivska Square. It was the border of the city, and the forest was already outside the city. It was a real wild field, as they say. A huge forest. Go and so that they would register her there. When there is a registration in the Kyiv region, then one could get an apartment faster through the city queue. She went, they told her: “There is one old man there who will register her.” And she went to that old man, reached the village of Didorivka. She sees a house, enters the house, there is no one in the yard, but white sheets are hanging and there is a black dog standing, which stands as if motionless and looks somewhere at one point. She entered the house. In the house everything is in white sheets and there is a jug with red, uh, like tomato juice. And this jug began to glow red.

She saw that, got scared, ran out into the yard, sees, and the dog’s eyes are also red. She rushed out of Didorivka, arrived, reached modern Golosiyivska Square, took the tram. At that time there was a direct route to the modern Chernihivska metro station and there she came to her senses only. But what is interesting, despite the fact that she did not get the registration, she only got scared, somehow the queue began to move and she received the apartment.

Later this apartment became small because she had three children. It became cramped for them in the small apartment with her husband. And they sold this apartment in Kyiv and bought a larger one in Brovary, well, where they live to this day. And here she wrote such a letter and agreed to tell all this in an interview on television.

When she told this, it was a sensation. And after that the sensation became even bigger. And it is still discussed in the esoteric press.

It was already somewhere around the 2000s. Two women who are engaged in equestrian sports. Some foreign delegation arrived there and demanded that the athletes who ride horses do something like a sports parade for the foreigners.

They did what was needed and rode on horses to the hippodrome to hand over the horses. To do this, you need to go from Khreshchatyk and further along the Sorokorichchya Avenue. And the horses were very tired, they needed to rest. They decided to ride through the Golosiyivsky Forest so that the cars would not scare the horses.

And they rode past the place where the monastery is where Mother Alipia is buried.

They rode further, there is Lake Didorivka further, behind it there are cattle burial grounds and fields. And when they rode out into these fields, they rode out onto a clearing. The clearing was very interesting. There stood wooden poles. On these poles were skulls, but not human ones. There was a cow skull, a goat skull, a dog skull, a wolf skull, that is, skulls of animals.

And above it there was an inscription in Old Slavic language on a special tablet. Everything so that the traveler, have you done everything on earth?

Have you finished all your affairs in order to enter this place.

They got scared to see such a thing in the forest and such a tablet. They spurred the horses because the place was scary. They galloped, galloped, galloped, and again came out onto this clearing. Then they galloped along the second path, along the third and again came out onto the same clearing. There is no way out, as they say. Then they began to try to contact their relatives by mobile connection. Mobile connection did not work. They looked at the sky. The sky was not the color it is with us. They rode away along one of the paths, the connection appeared.

They called their relatives. The relatives found a bioenergy specialist Anatoliy Ivanovych Shevchenko, who once searched for water and oil in Kazakhstan and found it using a vine and frames.

He was one of the best searchers for these underground storages in Asia. They found him and he says: “Yes, drive 300 m there, stop now and wait two minutes.” He looked at it with frames.

Now 300 m to the left. Drive, stop. Now again to the right 600 m somewhere drive. And they followed his instructions, went through the forest and came out near the Zolotyi Kolos hotel. They were exhausted and the horses were not just scared. Scared is nothing to say, but they reached the hippodrome, handed over the horses, arrived home. And they started to have a high temperature, such a high temperature that the ambulance came, gave the necessary injections, the necessary medicines, but the temperature lasted three days and then subsided on its own. And the horses were all in foam and they were not let out of the stable, veterinarians treated them for about three weeks after that. And then they still decided to come to the editorial office and tell this story, about which a whole story was filmed. But in the end nothing bad happened to them. They received education, received a good career, everything is fine in their personal life, so one cannot say that something bad happened to them. And further some people saw in the Golosiyivsky Forest some monastery, walked around it, and then wanted to find it, and it is no longer there, some medieval fortress. Even in that fortress there were people dressed as they should be dressed in the Middle Ages.

They even talked to these people, greeted these people. And the person who saw this fortress had oncology of the second degree. And after the person returned, two weeks later they did a tomography and there was no oncology, it disappeared as if it had vanished. That is, meetings with these phenomena, they are scary, really, one can get scared, but as a result one person’s oncology passed, another received an apartment. That is, the result is very positive, therefore they say that the Golosiyivska zone is anomalous, it is positive. But here many people also met Seraphim of Sarov, even in our times. I will tell about Seraphim of Sarov. Yes, Christianity considers him a saint, a Christian one, and he was such. But at the same time he had two initiations. The second initiation of Seraphim of Sarov was Vedic. He knew Vedic knowledge, because even in the description of his life, believers, when they came to him, saw, for example, that he was sitting in the temple in the lotus position, and sometimes they even saw levitation, he was flying in such a position, and he also knew herbs. Well, that is, the second part of him is, so to speak, a saint of the Vedic faith. He was simultaneously a saint of both religions. And he is known as a saint of the Vedic faith in Asia. And, for example, they talk about him in Kazakhstan, in Tibet, not as a Christian saint, but as a person who is initiated into Vedic knowledge.

And that is why he is a very mysterious figure, simultaneously both this and that. He lived for 15 years in a skete in the Golosiyivsky Forest, and then he traveled to other countries. He traveled to many countries, but he lived there for 15 years. But what he did there in Pechery, no one knows, but after that he became so fixed, so to speak, in the energy-information field that it constantly reproduces his figure. That is, one can walk through the Golosiyivsky Forest and meet him, even talk to him. And after that everything changes for the better.

That is, and the Golosiyivska anomalous zone, it can also repeat not only some monasteries there, libraries, but in general it can reproduce a lot of things. Because if I start telling all these phenomena of the Golosiyivsky Forest, it will be a lot. Therefore I have said the most important thing that will be interesting for our listeners to hear.

And therefore further research continued. TV channels recorded with each witness who gave an interview on the channel exactly in which place in the forest they met the phenomenon. And all the points were geographically plotted on the map of the forest. After all the points were connected by lines, the lines intersect above Lake Didorivka.

Lake Didorivka, by the way, from the place where Alipia is buried is approximately about 3 km.

What is Didorivka? Here one needs to figure it out. Did Or. Who is Did? It is grandfather, great-grandfather.

This is clear from the language. Who is Oriy? According to Slavic beliefs. Just as Christians have Adam and Eve as the first people, and in India the first people are Svayambhuva and Shatarupa. Similarly, the first ancestor of many Slavic tribes and ethnic groups was Or or Oriy.

There are a lot of geographical historical materials. Oh, this is the first ancestor. He is even called upon to help his descendants.

Well, so Didorivka is grandfather first ancestor, translation into modern language. That is, apparently, in the Golosiyivsky Forest thousands of years ago there was a center where many Slavic ethnic groups originated. That is, this is the place of the first ancestors of the Slavs, precisely Lake Didorivka and near the lake the village of Didorivka. And these names are also thousands of years old. That is, this is what turned out, that there is the first reason, and then even more interesting.

It turns out that people from America, from Australia, from New Zealand who study our folklore, they saw all this and know about this lake. And further there is such a Vedic custom, kora. What is kora? If you see, for example, a strong oak, if you walk around it, the universe or the Almighty gives you the same strength that this spirit has.

If you walk around a sacred lake, for example in Tibet, it is near Lhasa, then God gives you the power of this lake. If you walk around Mount Kailash, you receive the power of Mount Kailash and so on. That is, kora is not only with Kailash, it is with any object that has great power.

And therefore people who are in complete despair, there business is not going, they are sick.

Well, such a situation is already hopeless.

They come to Kyiv and walk around this lake. And after that everything changes. Many foreigners turned to me for help so that they would fly and they wanted to walk around Lake Didorivka. And there is a whole pilgrimage there. They did not know about this. After foreigners began to give interviews in the press, then everyone already began to know that if something is needed, one should go and walk around Didorivka.

That is, this is a very ancient place. And also, what is interesting, in Slavic folklore there is an interesting thing. About 4,000 years ago the zhrets or volkhvs, they can be called differently, built a huge underground city under Golosiyevo. And they lived there. And it was a sacred place, like in India Mount Kailash, which one cannot climb, and whoever tries to climb may die. The same with Golosiyevo. Only zhrets could enter there. People who were not initiated did not have the right to enter. And there they performed a lot of rituals. And these underground caves have been preserved. A geoscanner shows that they exist. Archaeologists will excavate them and will continue to excavate and even promise tourist access someday. According to legends, in general from the Dnieper an underground river was built artificially. Along which boats could sail into this underground place and sail out from there. And also what is interesting is that possibly the Golosiyivsky Forest is generally an artificial structure, because there are ravines there, small earthen mountains, they all, as sometimes it seems, they are artificially piled up. And this has been confirmed by many people, because when they began to do aerial photography of the Golosiyivsky Forest and analyze the photographs, they saw that it is definitely a mandala or yantra, a geometric pattern, a huge geoglyph that possibly our ancestors once built, but why and what was the reason to make such a huge geoglyph that is visible even from an airplane or from space, like the drawings in the Nazca Desert, no one knows. That is, we see that the Golosiyivsky Forest is indeed an anomalous zone, but unlike other anomalous zones, even though it may scare you, something good will happen, or healing, or improvement of life. And it has always been like that there under any religion that ruled, there was the ancient Slavic Vedic one, it was considered

a holy place and prophets of this religion lived there. It became a Christian place and there appeared Seraphim of Sarov, there Mother Alipia, and others.

What other religion was there? All, well, all saints of different religions practiced there, because it is a place of power, there is a connection with the first source, there is something divine.

We went many times with television to priests and asked them: “Please tell me why such things happen here, these things happen?” Well, the TV people wanted to catch them so that they would start, for example, swearing. They would say: “Go away.” No, they reacted very interestingly. They fell silent, and then said: “In order to figure this out, one needs special theological education. If you have it, you will figure it out.” And they came out very worthily. This interview with them was also there. We were interested in what they would tell us about meetings with the supernatural in this forest. There are many there, there are healing springs and healing herbs grow there that do not grow anywhere else. Many lakes, very ancient trees, a very unusual landscape. And what was there further? The ancient zhrets knew that there would be a decline in spirituality in the whole world, including their spiritual currents. And they opened the gates between the worlds and went into these gates and left the Golosiyivsky Forests to people.

And that is why Golosiyevo has this name? Because when you walk for a long time through this forest, you begin to hear voices inside yourself that begin to give some useful information. And Golosiyevo is named so because of the voices that sow the truth. And if you walk through Golosiyevo, these voices can tell you where the gate between the worlds is so that those who wish can also pass through it. Here is another legend.

Well, yes, I have briefly told you and you understand that this is only the tip of the iceberg, because one can write books about the Golosiyivsky Forest.

It is huge, it is large. It starts at Golosiyivska Square in Kyiv and ends all the way beyond Kyiv. And a lot of things are located in it. Ancient monasteries are located there, an astronomical observatory, hospitals, and tourist routes. A lot of everything. It is really a heritage. And when they began to study it as a place of power, you know that commissions of the Vatican study places of power all over the world, and Buddhist commissions that work with the Dalai Lama and Tibet, and various secret orders like the Rosicrucians and others, they collect material about places of power and classify them. There the first category, second, third, the first category is super powerful. For example, Kailash, Machu Picchu and so on belong to it. In Ukraine five places belong to the first category and the Golosiyivsky Forest.

All who researched it from secret societies to various religions said that this is a place of power of the first category, the same as Kailash and Machu Picchu and other world places of power.

People walk there and do not even know about such a thing. Then they meet a phenomenon and do not know how to explain it.

Here we have explained, if one simply walks through Golosiyevo, there is such good energy there, a person is healed both psychologically and healing from various diseases is launched. Therefore walk through Golosiyevo, I am going to Kyiv and will stroll through the Golosiyivsky Park.

That’s all, time. I yawned somewhere, it seems four times. Somewhere I heard such a thought that when we are in safety or when the aura of the person we are communicating with is also, well, say, healing, then clones immediately make us sleepy. We are so calmed, we calm down very much and want to rest the whole body, the whole organism. Therefore a compliment to you, Mr. Eegor, that with you I feel safe now. It is very interesting to listen to you, really, and one really wants to talk, talk, talk on this topic. It is very voluminous, it is very interesting, it seems to me, no matter from which side you approach, there is something to tell. And perhaps somehow we will make a separate broadcast, yes, dedicate it to this topic and, say, we will still sort everything out on the shelves. And friends, you have a unique opportunity to write us questions in the comments now in live mode and we will then know what to talk about. I would like to return a little bit to politics and talk on the topic of the war in the

Middle East, because in principle this topic, it is topic number one this spring. It does not subside in the news information space.

Every day we see new statements from Trump.

Every day we see that in principle the conflict has not ended yet and, well, something inside tells us that this can drag on for a long time. But I would like to hear the opinion of the expert from you, Mr. Eegor. Will this conflict really end at all? How will it end? Where is it heading? What will they come to. And in general, to what extent can we even now raise the issue of the global financial crisis, because it is clear that if the conflict grows even more, then this can have and carry with it a very negative series of consequences.

Yes, the war in the Middle East is interesting. For that I can tell about the relations of the former Persia, this is modern Iran with Ukraine.

Precisely Persia once tried to capture one of our ancestors, we have many peoples as ancestors, including the Scythians, they tried to capture Scythia. The troops of Persia came to the territory of Ukraine, but they could not win because the Scythians used a clever tactic, the same as the Cossacks. That is, they saw that the Persians, for example, were determined, and they retreated. Those further across the steppes, these steppes went on the offensive, and then found themselves in the middle of the steppe, where there is no water, they do not know what to eat, they do not know where the enemy has gone, they do not know. And they begin to retreat. And here these Scythians enter from the flanks, beat them. They again on the Scythians, the Scythians again retreat, advance. Well, that is, they play with them like a cat plays with a mouse. And the Scythians played for quite a long time. And it came to the point that they exhausted the Persian army. They understood that the peoples who live on our territory cannot be subjugated or killed, there is no possibility. And they went back to Persia and did not attack anymore. That is, they, as they say, got a setback. They very much, several times tried to gather troops to attack and capture our territories. Not once did anything happen. By the way, they did the same in Egypt.

I will say because ours do not know. The thing is that in Egypt there was such a temple, there were temples of Amon-Ra – this is the sun god. Amon was such a thing as something primordial. This was the god of the sun of the world. Here they wanted to capture Egypt, but the Egyptians initiated Alexander the Great in the temple of Amon-Ra in the Siwa oasis. And a miracle happened. Earlier he either lost or won, that is, he was unsure of himself. And after the initiation he became a great commander and began to smash the Persians for real. The Persian king Darius did not like this, and he sent to Egypt a huge army of people who were supposed to capture a significant part of Egypt and destroy the Siwa Oasis together with this temple where Macedon was initiated. And what do we see? This army completely disappeared in the desert, in the so-called Nubia nearby. They did not reach it. They were found, their corpses only in the 20th century. They searched and could not find. The Persian army, it simply disappeared completely. After that they tried to attack Siwa twice more. And in the same way their armies disappeared. And the thing is that the Egyptians, just like the ancient Ukrainians, were sun worshippers.

Also we had the god Surya, the sun god, and also Yarilo, Samiyar, there were actually many sun gods. By the way, the god Surya is the same in India, the sun god, and among our ancient Slavs the sun god.

And the sun won, it defeated the Persians.

And they touched Ukraine again and touched Egypt again. And that is what is being replayed that was lost in antiquity.

The thing is that if we talk about Persia, about the Iranian people, it does not trust its leadership, because there thousands of people are executed for nothing. A woman did not wear a headscarf properly, a man did not smile properly. To prison and execution. They have already killed so many people there. What kind of regime is this? The people do not love it. The people of Persia are not those who rule it now. The thing is that yes, they need to be removed from power, because otherwise there will never be peace in the Middle East for anyone. Neither for the countries of the Persian Gulf, nor for Muslims, nor for Christians, nor for any religion that is there at all. Because

that branch of Islam, Shiism, which now rules Iran, well, I am not even sure that it is Islam. They made of it what they themselves wanted. And it still needs to be taken away somehow. And all countries understand this. And therefore they will do everything possible to still overthrow this regime and so that normal people come to power.

It is possible, but you understand what happened? There were very large protests in January.

If a military operation had started then, there would have been many people against the authorities who would have made a revolution. But the fact that they made a break for two months, then the regime managed to kill all the protesters and now there is no protest potential in sufficient quantity. Therefore other countries have to use military force. So further. What I think personally there will not be a crisis, there will be a small one, because in fact oil is not only in Iran. A huge number of countries have oil. For example, the same Australia, the same United States. Now Venezuela has the largest oil reserves in the world. Now everyone will switch to other, non-Iranian sources, and everything will return again. But everyone has already understood that something needs to be done with Iran, because otherwise there will be no peace for anyone. Well, the same as they understood about Russia, that if it is left in the state it is in now, then it is a constant threat to the whole world. That is, here they are like: “Well, and earlier our plane was shot down, you know, and it supplied Shaheds that attack us every night.” That is, Iran is an enemy. If we take what we Ukrainians want, for example, I do, then so that there is no leadership of Iran, because this is a threat to everyone and to Ukraine as well. They have already threatened us, their ballistic missiles can already reach our territory from Iran.

Do you understand? Therefore something needs to be done. This economic crisis is not a very strong one, it can be survived, but something needs to be done with that government. They have simply entered a dead end and do not know how exactly to overcome them, what to apply.

What has been applied has not worked 100%. Therefore now they are thinking how to still apply something else that will lead to success.

I think they will find it and it will lead to success. This is about the Middle East.

Iran really cannot be given nuclear weapons. It will strike everyone and us as well. This cannot be allowed at all. And they will not allow it. A solution will be found.

Well, this is relative. It is not very pleasant, it is not very pleasant that we are talking about such things and about the fact that we live in such a time, because one would like everything to be more or less peaceful, calm, especially on our land. By the way, regarding our land, I would also like to talk about the topic that Volodymyr Zelenskyy congratulated Peter Magyar on his success in the elections in Hungary. And actually it is clear that the Hungarians chose their future, not choosing the past. And we can already see a number of statements from the Russian Federation, from Hungary, from Ukraine and our authorities. If we talk about future cooperation, future as future communication between Ukraine and Hungary, what it will be like, whether we will be able to find a connection, yes, a common language, still build quality communication. And accordingly I really wanted to talk about the issue of relations between Hungary and the Russian Federation, because the Russian Federation is already shouting from different sides that they never, so to speak, were friends with Hungary and in general they are starting to launch IPS again. So, Mr. Eegor, the floor is yours, we are listening to you.

Well, look, Hungary is a very interesting country. I have been there more than once and researched, for example, places of power. They have very interesting ones, even near Budapest. When I was in Kazakhstan, the Kazakhs told me that the ancient Hungarians lived on their territory and there are still tribes that consider themselves Hungarians.

And after that some legend that a bird appeared. This is an eagle with a snake neck Turul. And it led the Hungarians from northern Kazakhstan through two continents, through Asia and Europe, and brought them to the place where they now live. And there is even a mountain in Budapest where, according to belief, this bird flew

inside the mountain and this bird Turul still lives there. And this bird Turul plays a very big role. It is a national symbol. And first, second, it is a mystical creature.

It is even, when weddings go, marriages go, it is necessarily depicted on the walls. What is this? I studied it. The thing is that in Kazakhstan and in other countries of Asia the oldest religion is shamanism. And God in them was called the word Great Spirit.

The Great Spirit had two manifestations. The first manifestation as the king of the material world. This is the Eagle. The same as in Kostanay. And the same as among many peoples on other continents, the spirit that rules the material world is the eagle. And the spirit that rules what is hidden, the spiritual world, the hidden world, is the raven. And precisely the bird Turul therefore has, first, it is like an eagle, and the snake is the ruler of phenomena, so to speak, if in Vedic terms. And this snake, which has a neck in the form of a snake, this is nava. This is the transition between worlds. This is very interesting. But further, what interesting you will see if you come to Budapest, there on many temples or on the cathedrals of Matthias Corvinus there are black ravens. And everyone cannot understand why Hungarians put these ravens on cathedrals.

And why did Corvin do this? And now it is clear, because among the peoples who live in Asia, the raven is a symbol of the absolute itself, of God himself. Among them, just as among Christians it is a dove, the Holy Spirit, and among them the raven. And that is why they put the raven. And the raven and the eagle are present simultaneously, as it was then in that ancient tradition. But not only that. The thing is that in Europe also the former religion, one of the former religions is the Celtic religion, which still exists, for example, among the Irish.

And it has also been preserved with us. There also the raven is the god Lugh, and the god Lugh is the god of our galaxy, the Milky Way. And therefore on all paths connected with the galaxy it appears to people in dreams. We see this raven. And also in the Scandinavian tradition the great raven Huginn, and also our god Veles can turn into a raven. So with the raven it turns out very interesting. Very interesting. The Hungarians were friends with us during the times of Kievan Rus. The thing is that Kievan Rus was a huge state with a large territory, a strong army, economy and agriculture.

One of the daughters of Yaroslav the Wise married the Hungarian king and gave birth to him a son. That is, connections from those times, moreover family connections. And after that many very prominent people who can be called aristocrats of that time, they made marriages with Hungarians, both men and women.

And Kievan Rus guaranteed Hungary that no one would destroy it. That is, we were during the times of Yaroslav the Wise, we were like under the patronage of our Kievan Rus was Hungary. There were very good relations. And by the way this beauty and even the doctors suspected that she might not give birth to a child. And that is why when she was taken to Budapest, there are thermal waters that come out from the depths of the earth. She constantly bathed in these thermal waters, completely changed, became a beauty and she gave birth and gave birth. That is, these waters completely changed her. And she was no longer like that, no one doubted that this was a mature woman. She also made good decisions in politics, and she was healthy, and beautiful, and raised children well.

Legends are now made about her.

In general, Yaroslav the Wise's daughters married many kings of Europe. What we know about Anna Queen of France, this is only the most, well, what we know, because it is the most popular. About the other daughters we do not even know. There are even more interesting stories. That is, our aristocrats, princes became related to the kings of Europe back in those times and there are connections.

Here is what I think, that these connections have finally taken the upper hand and everything will be fine with Hungary. Hungary will begin to revive that strength that it gained after contact with Kievan Rus. They then became after some time, after several generations a very strong kingdom that influenced the fate of Europe. Well, and the same, if they are in good relations with us, then the power of the Ukrainian spirit will help the Hungarians to recover. Many Hungarians understand this, because I communicated with them. They understand it exactly this

way, that precisely this communication between peoples will give some perspective. Yes, Hungary is reviving. A new era has come. Dark times have passed and darkness is receding, and therefore light is being born. And therefore the Hungarians will return to that same state of a strong state and strong spirituality in which they were still then under Kievan Rus. They will return.

Even the Hungarians understood that with Moscow in the form that Moscow exists now, you cannot cook porridge. You cannot cook anything, only destruction. Destruction, there are various scandals, there is a fall in the economy. And oil can be bought not only in Russia. Now routes will be built and they will buy. They understood that if they want to be a strong state, they must develop themselves and they will not communicate with those. That is, the people of Hungary have finally understood this. I think it will be positive.

Well, super. The main thing is that everything is really for the benefit first of all, of course, for us and for our country. And so that it is more or less calm in Europe, because it is clear that we need to maintain a connection with the European Union as well.

And we move on to questions from our viewers. First of all, they greet you and us from New York, they convey: “Greetings to the comradeship, victory over the mountains, greetings to us with you and to all ours.” A question to Mr. Meheda, or rather a request, if you please, a few words about the rituals of the decenary.

You explained nicely about the eight-pointed star plus top and bottom. The same with Spas and energies. Are there any more such meditations?

Look, about the decenary. There are a lot of rituals there, they are complex and we will not be able to sort them out here in one broadcast. Well, so that you understand, in many religions there is the Most Holy Decenary. For example, in Hinduism this is the dashavatara. 10 manifestations of the Almighty.

Just as a person has 10 fingers on the hands and we can build houses with these hands, plant plants, that is, do a lot of everything. The same, as these religions say, God and man, they, man is like God, then these 10 fingers are not only with us, but also with the Almighty. And they build the universe. And if you know how to do it, then we will also be able to take part in the process of building the Universe.

This is the Most Holy Decenary. There are 10 manifestations of the Almighty. They come from 10 sides of the world. And with each of them one can establish a connection with consciousness. When all 10 manifestations are connected with you, then everything you ask for, for example, healing or something else, it will happen. We, for example, used the decenary rituals in order to go to Cambodia. The thing is that going to Cambodia is a huge cost of plane tickets. Some people are not allowed by their families, where are you going.

Some do not want to give vacation from work. Some are afraid, that is, it is impossible to accomplish, for example, a trip to Cambodia. We performed the decenary ritual, that is, we agreed with each manifestation of the Highest so that it would support this trip. In a month we were already standing in Angkor, in Angkor Wat. This is a huge ancient temple. It was dedicated to Vishnu.

There was also a statue of Shiva there. And after that there was also a statue of Buddha. It still stands on the highest tower.

It happened. And further this decenary is in the Vedic traditions. And among our Cossacks the same in the Spas system every person has 10 souls. They are described, how they look, or 10 manifestations of one and the same soul. And with each soul one needs to agree on cooperation. And when all 10 will help you, then you will have everything. But if you think that other religions do not know this, they do. Among alchemists there are 10 alchemical kings, in Kabbalah 10 sefirot or fires.

And further we will see even cathedrals this Notre Dame and so on. 10 columns five and five or 10 buttresses, 10 commandments there. That is, in many religions, either explicitly or hidden, there is the teaching about the

decenary. And whoever understands this teaching can do great things. Well, we will talk about this sometime, and I have told what it is exactly.

Class, super. We will definitely talk.

Very interesting. I listened with great attention. And for the last there is still a question from our viewer, a female viewer. Good day.

Please tell me how to understand or find out who we were in the past, possibly kings and witches. Thank you. And happy holidays to you. Well, how to do it? Everything is very simple.

When a person begins the path of spiritual revival, that is, performs rituals, meditations, accumulates energy. When there is a lot of energy, it opens the memory. The same, for example, was with Buddha. Buddha did not remember his past lives, but when he accumulated enough energy, more than 700 incarnations opened to him, about which it is written in the sacred Buddhist book Dhammapada. That is, this will open, one does not need to open it specially, because, for example, in the Vedic traditions it is said why we ourselves closed these memories when we incarnated on earth. Because when we incarnated on earth, we wanted to create something, to know something, to understand something and to do it not with the mind, but with the heart. And for that the memory of past lives would interfere, because then the mind would turn on and we would turn into a machine. If we want to be people, to evolve and to receive eternal development, then some past incarnations may be unnecessary for us, because what is important is what we do and create now.

Well, and also I want, as I understand, we are already approaching the end of this Sunday's interesting moments. First, on Saturday there will be a small alignment of planets. Four planets will line up in a row in the sky. This is considered that a person has chakras, and in the solar system the analog of chakras is the planets. If the planets line up in a row, even four, they initiate the activation of chakras in a person, and all chakras fold into a chakra bridge. And the chakra bridge gives the soul the opportunity to pass in meditation into higher states and there communicate with divine forces. And therefore this is a very favorable moment. This is the first. Second. On the 19th on Sunday there will be the perihelion of comet PanSTARRS. The planet, the comet will pass perihelion at a distance of 27 million km from the surface of the Sun. This again will be some changes on our planet that we do not know, well, we do not know what exactly will happen, it is unknown, but there will be great unexpected changes. And also on Sunday the Moon connects with the constellation Pleiades. The Pleiades is a mystical constellation. It is recognized by all religions of the world as mystical. Information comes from there, interesting dreams, initiations, meditations. Spirits come that help people. And it is known, the Pleiades is with us, it is the Pleiades in Europe, Kartikeya is the Vedic name, Indian, and also seven sisters, seven angels, seven spirits. Well, that is, this constellation is considered very mystical. It is located in the sign of Taurus.

And when the Moon, the Moon is a symbol of the human soul. The human soul is a symbol of the Moon.

The Moon in the Pleiades is the turning on inside our soul of mystical properties. By the way, the alignment of planets will last several days, and the comet will be visible for many days. And these phenomena coincide with the passage of the Moon through the Pleiades. This will be something incredible. Do not miss it.

Any meditations will be very good, they will give a lot of information. As I understand, these are super powerful days when one can gain energy and charge a little, so to speak, from nature, from the cosmos.

Everything is correct. Not only to charge, but also to receive some interesting information in the form of insight from within oneself.

Wow. That's what is needed. Mr. Eegor, thank you very much for today's broadcast, for these incredible almost 53 minutes.

They flew by simply, I did not even feel it. It is very easy with you, as always. Interesting, meaningful and I will be waiting impatiently, I think, as well as our viewers and subscribers, for the next meeting.

I will also be waiting, it is very pleasant to communicate with you. And our readers, they are very, viewers, sorry, very good, they ask such questions. Intellectual, that it is pleasant to answer them. We have a very good communication. We will continue. I am very grateful to everyone.

Thank you again. And friends, thank us also with likes, subscriptions and also subscribe to all the channels and pages of Eegor Meheda. The links you can find in the description under our today's issue. Be sure to join the discussion in the comments. Write how you are preparing for the next, or rather these weekends, which will be super powerful, energetic, whether you will conduct practices. And of course leave questions that we could reveal in the next broadcasts. Be sure to click on the bell so as not to miss any of our live broadcasts and be sure, be sure to thank with a like, as I already said. Mr. Eegor, thank you very much again and see you. See you. See you.
